SUMMARY

A determined Informatics student at Institut Teknologi Bandung with a strong passion for using technology to create positive social impact. I enjoy doing teamwork and am committed to continuous personal growth and meaningful contribution. I am currently interested in Cyber Security and DevOps projects and planning on having specialization titles in my next semester.

EDUCATION

Bachelor of Informatics Engineering, Institut Teknologi Bandung

Aug 2023 - Present

- Current GPA of 3.56/4.00

PROJECTS

Developer, Nimonspedia - Marketplace

- Built a responsive marketplace and auction platform using React (Vite), Node.js + PHP backends and WebSocket sockets
- Engineered WebSocket bidding and chat with Redis session handling and an asset library of hundreds of images to support robust bid/session synchronization and testing.

Developer, O.W.C.A. Logistics System

- Built a Java-based logistics management system with a dynamic plugin architecture for modular, extensible functionality.
- Developed a JavaFX desktop interface for shipment, courier, and system management workflows.
- Implemented Role-Based Access Control (RBAC) to secure user access and application features.
- Added real-time shipment tracking and JSON-based data handling for reliable state management.

Developer, Indonesian Pascal-S Compiler

- Developed a custom Pascal-S compiler in Python, constructing an Abstract Syntax Tree (AST) to process syntax and semantic analysis.
- Implemented a Deterministic Finite Automaton (DFA) for lexical analysis, successfully translating custom Indonesian keywords into executable logic.

Developer, Purry Leveling - RPG Game

- Programmed a turn-based RPG game in C++, applying advanced Object-Oriented Programming principles including deep inheritance and polymorphism.
- Designed scalable class systems for characters, inventory management, and randomized dungeon generation.

EXTRACURRICULAR EXPERIENCE

Deputy Minister of Work Accountability, Kabinet KM ITB

Jul 2025 - Apr 2026

- Oversaw and audited the OKR (Objectives and Key Results) of programs across all ministries within the KM ITB Cabinet

Deputy Head of Welfare, Himpunan Mahasiswa Informatika (HMIF) ITB

Apr 2025 - Mar 2026

- Assisted in managing 30+ staffs and interns focused on supporting student well-being and member services within HMIF ITB
- Identified student needs and provided responsive solutions through welfare-related initiatives and support channels

Speaker, HMIF Leadership Class 2025

Sept 2025

- Invited Speaker for the HMIF Leadership Class, presenting to an audience of 100+ on the intersection of leadership and event operational
- Facilitated an interactive session that translated complex management theories into practical steps for planning and executing large-scale events

Chairman, Sekolah Perangkat Mentor OSKM ITB 2025

May 2025 - Aug 2025

- Led the leadership development program for over 70 OSKM mentors
- Designed and oversaw training curricula focused on leadership, facilitation, project management, and student engagement

Chairman, Wisuda April Himpunan Mahasiswa Informatika (HMIF) ITB

Feb 2025 - Apr 2025

- Led a committee of 100+ members to plan and execute the April graduation ceremony for HMIF ITB
- Set project direction, managed timelines, and facilitated inter-division communication to maintain clarity and alignment throughout the preparation process
- Supervised budgeting, resource allocation, and stakeholder coordination to ensure an efficient and well-organized event

Head of Mentors, Kaderisasi Wilayah STEI-K ITB 2024

Dec 2024 - Jan 2025

- Led the coordination, training, and performance management of 50+ mentors responsible for guiding 300+ new students through different majors in the faculty
- Collaborated with various committees to ensure a supportive, structured, and impactful experience.

SKILLS

• Hard Skills

- **Programming Languages:** Python, Java, C/C++, TypeScript, JavaScript, Go (Golang), Kotlin, SQL, Bash/Shell, Assembly
- **Web & Mobile Development:** Next.js, React.js, Node.js, TailwindCSS, Flask/Django, Android SDK, Jetpack Compose
- **Data Science & AI/ML:** NumPy, Pandas, Scikit-Learn, Matplotlib, Neural Networks (FFNN), SVM, Predictive Modeling, Optimization Algorithms (GA, Simulated Annealing)
- **Databases & Infrastructure:** PostgreSQL, MySQL, Docker, Room (Android)
- **Tools & Technologies:** Git/GitHub, REST APIs, WebSockets, JWT Authentication, LiveKit, Maven, Jupyter Notebook
- **Core Competencies:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Multithreading, OS/Memory Management, System Architecture (MVC/MVVM, Plugin)

- **Soft Skills:** Public Speaking, Effective Communication, Event & Project Management, Leadership & Team Management, Strategic Planning, Problem Solving
